

BMSE3003 Software Security and Safety (Assignment) – Marking Rubric

CLO3: Propose a solution based on a given case related to software security and safety. (A3, PLO9)

Criteria	Mark	Poor	Average	Good	Mark
Introduction					
Description of Software System	5	0 - 1 Descriptions are unclear and not concise.	2 - 3 Some descriptions are not clear and concise.	4 - 5 All descriptions are very clear and concise.	
Description of purpose and objectives of the system	5	0 - 1 Descriptions are unclear and not concise.	2 - 3 Some descriptions are not clear and concise.	4 - 5 All descriptions are very clear and concise.	
Description of system's stakeholders	5	0 - 1 Descriptions are unclear and not concise.	2 - 3 Some descriptions are not clear and concise.	4 - 5 All descriptions are very clear and concise.	
Description of main system functionalities and business processes	5	0 - 1 Descriptions are unclear and not concise.	2 - 3 Some descriptions are not clear and concise.	4 - 5 All descriptions are very clear and concise.	
Description of critical assets	5	0 - 1 Descriptions are unclear and not concise.	2 - 3 Some descriptions are not clear and concise.	4 - 5 All descriptions are very clear and concise.	
Description of importance of security and safety for the selected system	5	0 - 1 Descriptions are unclear and not concise.	2 - 3 Some descriptions are not clear and concise.	4 - 5 All descriptions are very clear and concise.	
Software Security and Safety Analysis:					
Student 1: Oe Khye Jin					
Clarity and Conciseness	4	0 - 1 Descriptions are unclear and not concise; Weak justification.	2 - 3 Some descriptions are unclear and not concise; Moderate justification.	4 Descriptions are very clear and concise; Strong justifications are provided.	
Demonstration on software security and safety analysis	4	0 - 1 Poor demonstrating on software security and safety analysis.	2 - 3 Moderate demonstrating on software security and safety analysis.	4 Excellent demonstrating on software security and safety analysis.	
Report References	2	0 No in-text citations and references showing in the report.	1 Several In-text citations and references are accurate, but some contain errors/ are incomplete according to APA Referencing Style.	2 In-text citations and references are applied accurately using APA Referencing Style.	
Student 2: Mah Jinn Huei					
Clarity and Conciseness	4	0 - 1 Descriptions are unclear and not concise; Weak justification.	2 - 3 Some descriptions are unclear and not concise; Moderate justification.	4 Descriptions are very clear and concise; Strong justifications are provided.	
Demonstration on software security and safety analysis	4	0 - 1 Poor demonstrating on software security and safety analysis.	2 - 3 Moderate demonstrating on software security and safety analysis.	4 Excellent demonstrating on software security and safety analysis.	
Report References	2	0 No in-text citations and references showing in the report.	1 Several In-text citations and references are accurate, but some contain errors/ are incomplete according to APA Referencing Style.	2 In-text citations and references are applied accurately using APA Referencing Style.	

Student 3: Mah Chun How

Clarity and Conciseness	4	0 - 1 Descriptions are unclear and not concise; Weak justification.	2 - 3 Some descriptions are unclear and not concise; Moderate justification.	4 Descriptions are very clear and concise; Strong justifications are provided.	
Demonstration on software security and safety analysis	4	0 - 1 Poor demonstrating on software security and safety analysis.	2 - 3 Moderate demonstrating on software security and safety analysis.	4 Excellent demonstrating on software security and safety analysis.	
Report References	2	0 No in-text citations and references showing in the report.	1 Several In-text citations and references are accurate, but some contain errors/ are incomplete according to APA Referencing Style.	2 In-text citations and references are applied accurately using APA Referencing Style.	

Student 4: Lo Tze Khang

Clarity and Conciseness	4	0 - 1 Descriptions are unclear and not concise; Weak justification.	2 - 3 Some descriptions are unclear and not concise; Moderate justification.	4 Descriptions are very clear and concise; Strong justifications are provided.	
Demonstration on software security and safety analysis	4	0 - 1 Poor demonstrating on software security and safety analysis.	2 - 3 Moderate demonstrating on software security and safety analysis.	4 Excellent demonstrating on software security and safety analysis.	
Report References	2	0 No in-text citations and references showing in the report.	1 Several In-text citations and references are accurate, but some contain errors/ are incomplete according to APA Referencing Style.	2 In-text citations and references are applied accurately using APA Referencing Style.	

Student 5: Jason Chew Jia Jun

Clarity and Conciseness	4	0 - 1 Descriptions are unclear and not concise; Weak justification.	2 - 3 Some descriptions are unclear and not concise; Moderate justification.	4 Descriptions are very clear and concise; Strong justifications are provided.	
Demonstration on software security and safety analysis	4	0 - 1 Poor demonstrating on software security and safety analysis.	2 - 3 Moderate demonstrating on software security and safety analysis.	4 Excellent demonstrating on software security and safety analysis.	
Report References	2	0 No in-text citations and references showing in the report.	1 Several In-text citations and references are accurate, but some contain errors/ are incomplete according to APA Referencing Style.	2 In-text citations and references are applied accurately using APA Referencing Style.	

Conclusion

Description of proposed improvements can enhance the overall security and safety of the system.	5	0 - 1 Descriptions are unclear and not concise.	2 - 3 Some descriptions are not clear and concise.	4 - 5 All descriptions are very clear and concise.	
Description of the importance of integrating security and safety throughout the software development lifecycle.	5	0 - 1 Descriptions are unclear and not concise.	2 - 3 Some descriptions are not clear and concise.	4 - 5 All descriptions are very clear and concise.	

Presentation					
Student 1: Oe Khye Jin					
Understanding	5	0 - 1 Poor presentation; do not understand the contents of the assignment at all.	2 - 3 Moderate presentation; can understand some contents of the assignment.	4 - 5 Complete understanding of all assignment contents that were submitted.	
Justification of why the software security and safety analysis can overcome the software safety risks	5	0 - 1 No or little justifications were provided.	2 - 3 Some justifications were provided.	4 - 5 Strong and convincing justifications were provided.	
Student 2: Mah Jinn Huei					
Understanding	5	0 - 1 Poor presentation; do not understand the contents of the assignment at all.	2 - 3 Moderate presentation; can understand some contents of the assignment.	4 - 5 Complete understanding of all assignment contents that were submitted.	
Justification of why the software security and safety analysis can overcome the software safety risks	5	0 - 1 No or little justifications were provided.	2 - 3 Some justifications were provided.	4 - 5 Strong and convincing justifications were provided.	
Student 3: Mah Chun How					
Understanding	5	0 - 1 Poor presentation; do not understand the contents of the assignment at all.	2 - 3 Moderate presentation; can understand some contents of the assignment.	4 - 5 Complete understanding of all assignment contents that were submitted.	
Justification of why the software security and safety analysis can overcome the software safety risks	5	0 - 1 No or little justifications were provided.	2 - 3 Some justifications were provided.	4 - 5 Strong and convincing justifications were provided.	
Student 4: Lo Tze Khang					
Understanding	5	0 - 1 Poor presentation; do not understand the contents of the assignment at all.	2 - 3 Moderate presentation; can understand some contents of the assignment.	4 - 5 Complete understanding of all assignment contents that were submitted.	
Justification of why the software security and safety analysis can overcome the software safety risks	5	0 - 1 No or little justifications were provided.	2 - 3 Some justifications were provided.	4 - 5 Strong and convincing justifications were provided.	
Student 5: Jason Chew Jia Jun					
Understanding	5	0 - 1 Poor presentation; do not understand the contents of the assignment at all.	2 - 3 Moderate presentation; can understand some contents of the assignment.	4 - 5 Complete understanding of all assignment contents that were submitted.	
Justification of why the software security and safety analysis can overcome the software safety risks	5	0 - 1 No or little justifications were provided.	2 - 3 Some justifications were provided.	4 - 5 Strong and convincing justifications were provided.	

Summary:

Student Name	(A) Introduction (30%)	Individual Task (10%)	(B) Total (50%)	(C) Conclusion (10%)	(D) Presentation (10%)	Total (A+B+C+D) (100 marks)
Oe Khye Jin						
Mah Jinn Huei						
Mah Chun How						
Lo Tze Khang						
Jason Chew Jia Jun
